

It Was A Dark and Snowy Night

Don't miss this exclusive seminar on Flying at Night and Winter Operations. Winter flying brings some unique issues to aviation. We'll discuss some risks to be aware when the temperature drops. When it gets dark, we see things differently. Some things are easier to see, some are more difficult. We'll discuss the physiological causes of the difficulties. Learn to avoid common mistakes when flying during these potentially hazardous conditions. Click the link below and register TODAY!

Directions: Take the General Aviation entrance to the Asheville Airport (across from the BMW dealership). Park on the left just beyond the trees. The Lacy Griffin Building is diagonally across the street.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
